

Sound Story Prompts

Choose a song you remember from your childhood. Why is it memorable? What else do you remember from that time about yourself and the world around you?

What sounds remind you of life in your suburb? Which sounds are no longer there and what do you expect will be the sounds of a future around where you live - in 10, 20, 50 or 100 years from now?

Imagine you are the director of a video or music clip called [insert your suburb name] *Sounds*. What instructions would you give to the production team so that they capture the richness and diversity of life around where you live, by day and by night?

Your hometown overheard... what snatches of conversations would you hear as you made your way around where you live on any given day?

Write a very short story set in your hometown in which sound - or lack of sound - plays an important part.
